EDUCATION

University of Massachusetts Amherst
B.S. in Computer Science, completed in 2.5 years
M.S. in Computer Science (4+1 program)

Amherst, MA
Jan 2027
Expected Jan 2028

EXPERIENCE

CustomersFly

Founding Engineer · customersfly.com

Jul 2026 – Present
Belmont, MA

- Designed and built a repeat-customer platform for independent restaurants in SvelteKit, TypeScript, Tailwind CSS, and shadcn-svelte
- Designed the PostgreSQL schema and data layer (Drizzle ORM, Neon) and implemented auth with Better Auth
- Built the automated guest loop end to end: QR-card signup pages, welcome/reminder/review-request campaigns over email (Resend) and SMS (Twilio), and tracked short links for per-guest attribution
- Shipped the owner dashboard (signups, offer clicks, in-store redemptions, reviews) and a public demo mode

Ocrila

Software Engineering Intern · ocrila.com

Jun 2026 – Jul 2026
Remote

- Rebuilt the full frontend of an AI voice-agent product for restaurants in four weeks (marketing site, owner dashboard, and admin pages) in Next.js, React, and TypeScript; 95+ Lighthouse scores in every category
- Refactored the frontend for maintainability; extended the admin dashboard's data layer and backend API routes

News Into Action

Software Engineering Intern · newsintoaction.org

Nov 2025 – Feb 2026
Remote

- Built the prototype of a civic-engagement web app that turns news articles into concrete actions (SvelteKit, Tailwind CSS); it became the foundation of the product now in public beta
- Integrated the Perplexity API to generate media-bias and accuracy context for articles
- Set up Cloudflare Workers deployment workflows and analytics

Chestnut Ventures Group

Software Engineering Intern · chestnutventuresgroup.com

Jun 2025 – Aug 2025
Remote

- Designed and built the investor-facing site for a venture firm leading Pre-Seed to Series A rounds (SvelteKit, Tailwind CSS), scoring 100 in all four Lighthouse categories
- Set up Cloudflare Workers deployment workflows from git push to production

PathCision Medicine

Software Engineering Intern · pathcisionmedicine.com

Jan 2025
Remote

- Built and launched the company site for an AI-driven precision-therapeutics biotech (SvelteKit, Tailwind CSS); configured Cloudflare deployment with builds under 2 minutes

MakeAI

Co-Founder & Full-Stack Engineer · makeai.org

Dec 2022 – 2025
Remote

- Built the web app for a no-code, drag-and-drop AI model builder in Svelte, reaching 17k+ visitors
- Owned deployment and cloud infrastructure for the model-training backend on AWS, GCP, and Oracle Cloud

PROJECTS

YourSplit · *SvelteKit, Supabase, Tailwind CSS, Groq API, Cloudflare Workers*

yoursplit.com

- Led a 4-person team building a web app for creating, saving, and sharing workout routines; live in production and open source
- Implemented Supabase auth (Google OAuth), PostgreSQL-backed routine storage and sharing, and an AI routine assistant via the Groq API; deployed to Cloudflare Workers

Open-Source Svelte UI Libraries · *Svelte, shadcn-svelte, Tailwind CSS*

github.com/olegpolin

- Published neobrutalism-svelte, material-svelte, and neoplasticism-svelte, component libraries built on the shadcn-svelte registry system, with 100+ GitHub stars combined
- Maintain a shadcn-svelte registry starter and a SvelteKit + Supabase starter template

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C, C++, SQL

Frontend: Svelte, SvelteKit, React, Next.js, Tailwind CSS, shadcn-svelte

Backend & Data: Node.js, PostgreSQL, MongoDB, Drizzle ORM, Neon, Supabase, Better Auth, Resend, Twilio

Cloud & DevOps: AWS, GCP, Azure, Cloudflare Workers, Vercel, Docker, GitHub Actions, CI/CD
